CURRENT EMPLOYMENT

Researcher, Microsoft   Oct 2022 - Current
Knowledge and Language Team at Microsoft Azure Cognitive Services Research Group

RESEARCH INTERESTS

Knowledge is power; knowledge graphs (KGs) are power to next-generation AI analytics. My research interests lie at the intersection of graph learning, data mining, natural language processing and machine learning with a focus on knowledge graphs, especially learning symbolic and semantic structures inside KGs and multimodal AI.

PUBLICATION SUMMARY

As of October 2022: I have accomplished 10+ Papers published papers and submissions (260+ citations), among which I first-authored papers published on top-tier venues (KDD, CIKM, BCB) from interdisciplinary domains across NLP, recommendation and bioinformatics. More up-to-date publications can be found in *Google Scholar*. Several research works and internship projects (such as P-Companion [2]) have been successfully deployed in market-scale product.
